

EPS Geomatics

**PLEASED TO PRESENT A RANGE OF NEW SERVICES
SUPPORTING DEVELOPMENT AND ASSETS**

AERIAL & TRADITIONAL SURVEYS

Fast, accurate, reliable aerial drone surveys – combined with traditional survey techniques where required – to provide contoured Digital Terrain Models (DTM), imagery, videos and detailed 3D geospatial data for onward design.

CUT/FILL & VOLUMETRIC ASSESSMENTS

Supporting earthworks projects (inc. Materials Management Plans), mineral and waste operations, and civil / structural design.

AERIAL INSPECTION & DIGITAL TWIN CREATION

Imagery of difficult, unsafe or costly to access features for regular asset management. Photo-realistic aerial and laser scan imagery for construction / maintenance auditing and marketing applications.
